

Sixth Grade Mummy Project

Students are asked to make a model of a mummy. Students must work in groups of three to make this project. When presenting, the students must be able to describe the model and say what they learned from it.

Materials: Some of the materials that students can use are gauze or cloth, toilet paper, paper towel tubes, newspaper, Styrofoam or papier- mache, etc. to make the mummy. The finished project should be displayed in a case. The case must be in length about 26" or 28" and width about 14" or 15".

Students must include four or five photographs. For due date check web calendar.
