

Sixth Grade Volcano Project

Students are asked to make a small model volcano with a crater at the top. Students must work in groups of three or four to make this project. When presenting, students will demonstrate the working of their project.

Materials: Some of the materials that students can use are clay, brown paper, chicken wire, baking soda, vinegar, food coloring, etc. Students must include a display board with four or five photographs.

The sample of project display will be provided later. **For due date check web calendar.**
